

COLLEGE STUDENT INTERN

Our Vision

Envision yourself as part of a team built on the foundation of servant leadership, where we intentionally support each other in growth as individuals and a company. Since 2001, we have been working in India providing businesses in the West affordable and quality IT resources to keep their companies growing, while creating local jobs that build team direction and personal growth. We need young, eager minds like yours to help take our company to the next level. We will be happy to cover in-country costs, such as food and lodging, during your stay.

Responsibilities

Your role with us will largely be driven by your personal career path and university education focus. If you're a graphic designer, for example, you will work closely with our **UI/UX** team. If you're planning on going into management, you'll work closely with our **project coordinators**. Regardless, you'll be participating in or even spearheading real, important projects. Every part of our business could use a new perspective and ambitious attitude to bring value to our organization.
