

## ***Professional Tanner - Job Description***

### ***Help wanted!***

***Job:*** Professional Tanner (Manager - Teacher – Trainer)

***Location:*** Sumatra, Indonesia

***Need:*** We are looking to hire a professional tanner for the processing animal skins into leather.

Must be able / willing to take initiative.

Working with and training / teaching locals tanning skills / trade.

***Overview:*** Currently a high quality, significant in size slaughter house facility is being constructed. We have an opportunity and are looking to attach to this a professional tannery. At this point we are still investigating opportunities and markets for the hides or potentially other products. Most probably we will be looking to export them from Indonesia as potentially the volume could be significant. We see an opportunity to add value to this product locally. It is also meeting a huge felt need among the local people.

### ***Tentative Job Duties/Responsibilities:***

- Notify supervisors or mechanics of equipment malfunctions.
- Start and control machines and equipment to wash, bleach, dye, or otherwise process and finish textile goods.
- monitoring product as it comes out of the machines
- Add dyes, water, detergents, or chemicals to tanks to dilute or strengthen solutions, according to established formulas and solution test results.
- Confer with coworkers to get information about order details, processing plans, or problems that occur.
- Stretching the hides, removing hair and applying the proper chemicals to prepare the skin for processing
- Monitor factors such as temperatures and dye flow rates to ensure that they are within specified ranges.
- Examine and feel products to identify defects and variations from coloring and other processing standards.
- Record production information such as yardage processed, temperature readings, tensions, and machine speeds.

- Remove dyed articles from tanks and machines for drying and further processing.
- Adjust equipment controls to maintain specified heat, tension, and speed.
- Inspect machinery to determine necessary adjustments and repairs.
- Prepare dyeing machines for production runs, and conduct test runs of machines to ensure their proper operation.
- Observe display screens, control panels, equipment, and cloth entering or exiting processes to determine if equipment is operating correctly.
- Test solutions used to process textile goods to detect variations from standards.
- Study guides, charts, and specification sheets, and confer with supervisors to determine machine setup requirements.
- Soak specified textile products for designated times.
- Key in processing instructions to program electronic equipment.
- Weigh ingredients to be mixed together for use in textile processing.
- Mount rolls of cloth on machines, using hoists, or place textile goods in machines or pieces of equipment.
- Perform machine maintenance, such as cleaning and oiling equipment; and repair or replace worn or defective parts.
