

TECHNOLOGIST

Intro

Envision yourself as part of a team built on the foundation of servant leadership, where we intentionally support each other in growth as individuals and a company. Since 2001, we have been working in India providing businesses in the West affordable and quality software development to keep their companies growing, while creating local jobs that build team direction and personal growth. We need people like you to help empower our employees with strategic processes and advance their technical skillsets.

Responsibilities

- Work closely with Developers and Testers, keep them accountable, and encourage them toward continuous learning and leadership
- Determine the nature of hardware and software issues, and communicate technical guidance and information to users
- Provide technical solutions and consulting to Clients
- Visualize the training and development needs of the technical staff and coordinate the implementation of adequate training programs
- Share acquired skills with team members both formally and informally
- Continuously learn in order to build a knowledge base of relevant state-of-the-art technology, equipment, and/or systems
- Create functional requirements for technology projects

Requirements

Experience

- Background in computer science
- Programming web or mobile application
- Agile software development

Working Environment

- Live in India
- Work in our 2 offices with our 130+ employees

Characteristics

- Has strong servant leadership ethic
- Establishes and maintains effective working relationships among team members
- Able to establish priorities and organize resources accordingly
- Analyzes and assesses operational requirements and current HR capabilities
- Capable of interviewing and evaluating the technology competencies of applicants
- Derives joy from tinkering and figuring things out
- Able to teach and inspires others to learn
